

Bread & Co

Bread & Co Aug 08

The Brief

Whitco were asked to upgrade and relocate the old bakery into a new baking facility and supply additional state of the art bread baking equipment. The specification for the appliances provided had to both modernize and cope with the huge increase in Bread & Co's business, but deliver "home made" "organic" traditional breads to their discerning customers.

We had to source a manufacturer that could design and build a bespoke oven that not only was efficient but could deliver a substantial range of hand molded and artistic breads. Bread & Co have since been recognized as an individual, award winning business with an impressive national client list.
