Modern Coffee Shop Concept

The Brief

Working alongside architects and Building Contractors, we were asked to design a modern “Coffee Shop” concept, incorporating hot, cold and ambient food serveries, a comprehensive beverage section within their new catering facility.

To cater for existing clients and visiting VIP’s offering quality food and beverages.

To diversify and offer private catering for hospitality and corporate events.

Challenges.

To work alongside other trades and deliver large pieces of equipment into the building whilst major ground works were incomplete. This was a necessity for all contractors to complete by the required time frame.
