

The Eltisley

Renovation and New Kitchen

The Brief

To design and install a new modern kitchen as part of a Charles Wells' renovation of an existing facility.

Challenges

The bespoke extraction/fresh air-in canopy, ensures that noise and odour emissions are kept to an acceptable level so as not to impact on neighbours, clients and the environment.

Our custom made stainless steel tables and sinks had to fit into the angles of this period property and make best use of space. Separating the sections i.e. washing, preparation, cooking and serving was a major requirement due to space limitations, however it was successfully achieved.

Once delivered all the equipment had to be dismantled and reassembled inside the kitchen due to restricted.

The equipment supplied was heavy duty, and well able to cope with the demands of a busy kitchen and able to adapt to provide a comprehensive and regularly changing menu, all from fresh produce.
