To design and install a Coffee Shop / Dining area, that would be attractive to enough to:

Capitalize on the "Grab & Go" concept, whilst at the time same time offering traditional meal options at affordable prices. The counter and furniture had to be practical and comfortable to suit the busy student of today.

The cooking equipment was to include a live the med theatre style presentation, with a traditional cook line, preparation area and banqueting facility to the rear to accommodate from 10 people to 500.

From a finger buffet to a formal dinner or from a drinks reception with canapés to tea and coffee as well as Vegetarian options and special diets.
