TESTEMONIAL

Lightfry Professional Air fryers

Extremely impressed!!! - Having worked with them, I was impressed by the benefits, the simplicity of use air frying both our marketing leading chips and newly developed vegan frozen foods, both had great outcomes, and our R&D chefs cannot wait to do more. Taste, temperature and appearance were spot on. We look forward to working alongside the leading manufacturer of air frying to create the market leading McCain food products, developed specifically for air frying.

Kaley Dunn, Key Account Manager - McCain Food Service GB.

LIGHTFRY COMMERCIAL AIR FRYERS

Established in Sweden in 2010, LightFry by Eatgood was developed with a clear vision: to provide a healthier and more sustainable way to cook traditional fried food. Its innovative Air Fry Technology uses hot air and steam instead of frying oil, helping commercial kitchens reduce oil consumption, energy use and environmental impact without compromising on taste or quality.

For more information on LIGHTFRY Commercial Air Fryers please contact WhitCo Catering & Bakery Equipment Ltd
